WOWEE ONE TURNS SURFACES INTO SOUND

WOWee ONE designs and develops innovative products that are redefining the face of sound. Founded a year ago, the popularity of the WOWee ONE speaker has gone global. Through strategic alliances and key distribution channels, WOWee ONE has an enviable and impressive market presence, bringing unique insights to the world of electronics. Based in the Southwest of England, this team of hand picked individuals is creating exciting must have items. The Managing Director Magnus Hammick, entrepreneur and author of many design classics, believes that the best ideas always come straight from the real world. We look forward to keeping his vision alive.

WOWee^{ONE}™

WOWEE ONE POWER BASS PORTABLE SPEAKER

The WOWee ONE is a compact portable speaker unit which provides a full range frequency response. It is intended for use as both a fixed and portable solution for all iPod, iPad, mp3, mp4, mobile phone and computer applications.

The WOWee ONE uses a hybrid technology of a standard speaker that delivers the mid to high frequencies, and a Gel Audio™ driver that delivers low end bass frequencies.

The extended low frequency response of the Gel Audio™ speaker out-performs any similar size device by producing bass frequencies around 3 octaves below the low end cut-off of a traditional unit.

This hard case provides added protection and storage for your WOWeeONE portable speaker. This premium case holds your unit safely and securely and provides a designated pocket to hold the cables.

The WOWee ONE mobile phone adapters allow you to listen music stored in your mobile phone with any WOWee ONE speaker.

package included:
SONY ERICSSON
LG
SAMSUNG
NOKIA
MOTOROLA (micro USB)

The gel bracket holds the WOWeeONE on the surface by fixing onto mounting legs, which are held to the surface by adhesive tapes. The tapes provided work well on nonporous surfaces as walls, doors or windows.

These clear adhesive pads (5 pads inside the pack) are designed for use with the WOWeeONE speaker system for application to most smooth sealed surfaces to provide an excellent sound response and secure fixture.

The splitter takes the signal from your audio source and splits it into two channels, left and right, meaning that when two WOWee ONE units are connected it sends one channel to each WOWee ONE giving you full stereo sound.

WOWee ONE™
